Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 1-13 are objected to because of the following informalities:

Claim 1, line 6, "an electronic device" should be changed – said at least one electronic device --,

Claim 1, line 7, "are" should be changed – is --,

Claim 2, line 2, claim 11, line 3 and claim 12, line 3, "an electronic device" should be changed – said electronic device --,

Claim 7, line 2, "a board" should be changed – said board --.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 5-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Wall et al. (6,054,676).

Regarding claims 1 and 7, Wall et al., figure 2, disclose a thermal management socket system comprising :

- a thermal management unit having a chamber (38 and 48), which is capable of receiving at least one electronic device (42);

Art Unit: 2839

- a plurality of first connectors (34) within the chamber may be electrically coupled with a corresponding plurality of device connectors (43) of the at electronic device; and
- a plurality of second connectors (36) is electrically coupled to the first connectors and may be electrically coupled to a board (26).

Regarding claims 5-6 and 8-10, the second connectors may be electrically coupled with a plurality of socket receptacles (34) within a socket unit (31), comprising of a pin grid array, a ball grid array and a land grid array.

Regarding claims 11 and 12, the first connectors are each comprising of a receptacle structure capable of receiving a corresponding device connector from the electronic device and comprising a raised structure capable of electrically coupling with the electronic device utilizing a land grid array.

Regarding claim 13, the thermal management unit comprising a base portion (37) containing the first connectors and the second connectors, and a cap member (45) removably connectable to the base portion for defining the chamber.

Regarding claims 14-21, the features in the method claims are identical to those in the apparatus claims. Therefore, the method of utilizing a thermal management unit alone is not a patentable feature.

Art Unit: 2839

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2-4 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over wall et al. (6,054,676).

Wall et al. disclose a cold plate (56) and instant claimed invention as described above except for a liquid thermal management system comprising spray cooling and liquid immersion.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide Wall et al. to have the liquid thermal management system comprising spray cooling and liquid immersion, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use. In re Leshin, 125 USPQ 416, for better cooling.
